

GAUMONT presents

HIGH

WALLS

Directed by ABEL FERRY

SYNOPSIS

A GROUP OF FRIENDS ON VACATION DECIDE TO VENTURE ONTO A TRAIL HIGH UP IN THE MOUNTAINS THAT HAS BEEN CLOSED FOR REPAIRS. THE CLIMB PROVES MORE PERILOUS THAN PLANNED, ESPECIALLY AS THEY SOON REALIZE THAT THEY'RE NOT ALONE. THE ADVENTURE TURNS INTO A NIGHTMARE...

A **VIA FERRATA** is a mountain route which is equipped with fixed cables, stemples, ladders and bridges. The use of these allows otherwise isolated routes to be joined to create longer routes which are accessible to people with a wide range of climbing abilities. Walkers and climbers can follow via ferratas without needing to use their own ropes and belays, and normally without the risks associated with unprotected scrambling and climbing.
